

INTRODUCTION

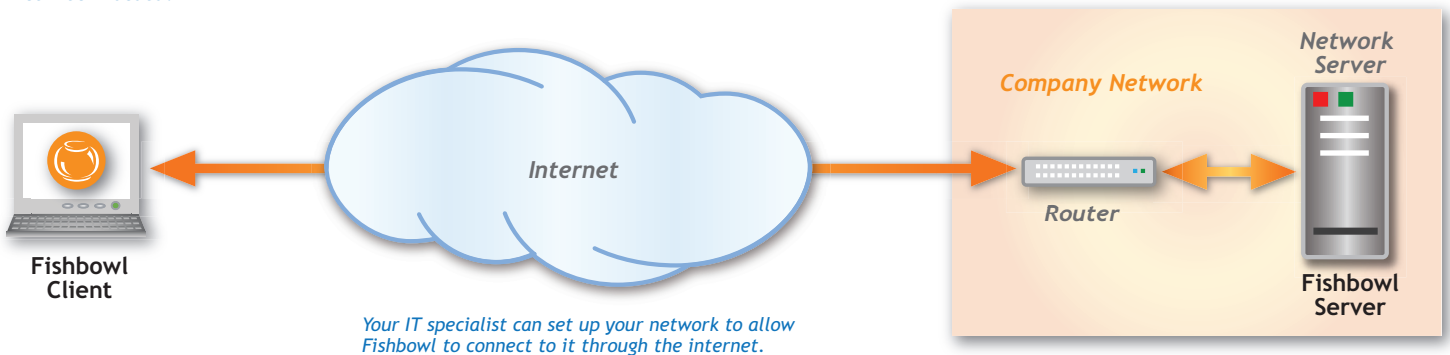

Setting up your hardware is an important part of getting Fishbowl Inventory functioning efficiently. Depending on the number of users and the complexity of your system, Fishbowl client and server software may reside on one or multiple computers. These three scenarios illustrate different ways Fishbowl may be configured to best serve your needs.

SCENARIO 1

*Local Network
Multiple Users*

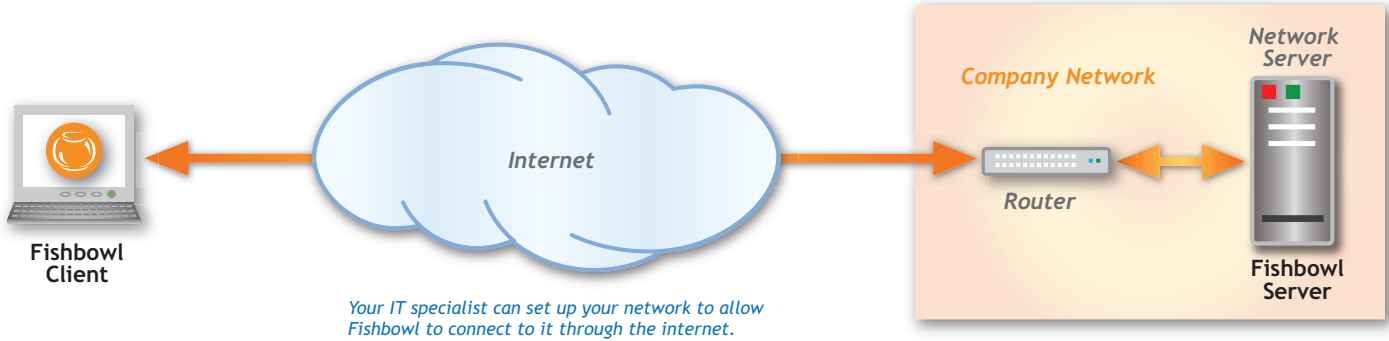

SCENARIO 2

*Public IP
Internet Protocol*

SCENARIO 3

Public IP
Internet Protocol

SYSTEM REQUIREMENTS

Fishbowl recommends that QuickBooks and Fishbowl Inventory run together on their own dedicated computer to avoid RAM sharing issues with other applications. Below are tables for small, medium and large database requirements as well as for Fishbowl Mobile (FMW).

SMALL DATABASE	
Database Size	<ul style="list-style-type: none"> • 0–100 Shipments per Day • 0–100 Work Orders per Day
Hardware Recommendations	SERVER <ul style="list-style-type: none"> • 2.3 Ghz Processor (Quad Core) • 4 GB RAM • Windows 7, 8, Server 2008, 2011, 2012 • Linux (without QuickBooks)
	CLIENT <ul style="list-style-type: none"> • 2.3 Ghz Processor • 4 GB RAM • Windows, Linux, Mac OS*
Minimum Hardware Requirements	SERVER <ul style="list-style-type: none"> • 2.3 Ghz Processor (Multi Core) • 4 GB RAM • Windows XP Pro, 7, 8, Server 2003, 2008, 2011, 2012 • Linux (without QuickBooks)
	CLIENT <ul style="list-style-type: none"> • 2.3 Ghz Processor • 2 GB RAM • Windows, Linux, Mac OS

LARGE DATABASE	
Database Size	<ul style="list-style-type: none"> • 100+ Shipments per Day • 100+ Work Orders per Day
Hardware Recommendations	SERVER <ul style="list-style-type: none"> • 3.4 Ghz Processor (Quad Core Plus) • 8 GB RAM • Windows 7, 8, Server 2008, 2011, 2012 • Linux (without QuickBooks)
	CLIENT <ul style="list-style-type: none"> • 3 Ghz Processor • 4 GB RAM • Windows, Linux, Mac OS*
Minimum Hardware Requirements	SERVER <ul style="list-style-type: none"> • 3.4 Ghz Processor (Quad Core Plus) • 8 GB RAM • Windows 7, 8, Server 2003, 2008, 2011, 2012 • Linux (without QuickBooks)
	CLIENT <ul style="list-style-type: none"> • 3 Ghz Processor • 2 GB RAM • Windows, Linux, Mac OS

* See **NOTES** on next page

FM STANDARD RECOMMENDATIONS	
Desktop	<ul style="list-style-type: none"> • Microsoft ActiveSync or Windows Mobile Device Center • 5 MB free hard-drive space • Microsoft Windows 2003 or higher
Mobile Device	<ul style="list-style-type: none"> • .NET Compact Framework 2.0 • Microsoft ActiveSync • 5MB free ROM space (recommended capabilities: 802.11b/g-enabled, barcode scanner attachment) • Mobile requires Windows Mobile 5 or 6 Pro (or later versions) • 3.5–3.7 inch screen with 240 x 320 resolution

*NOTES
<ol style="list-style-type: none"> 1. Fishbowl recommends that you install and run both Fishbowl and QuickBooks on their own server (does not apply for Small Database). 2. For a more complete list of supported operating systems please visit our website at this URL: http://www.fishbowlinventory.com/wiki/Supported_Operating_Systems 3. Contact Fishbowl for hardware requirements if database size is larger than specifications listed in the Large Database Table.

CALL FOR ASSISTANCE

Talk to one of our Inventory Software Specialists. They are highly trained professionals who will be glad to assist you in determining your inventory management hardware needs.

To see the actual **Fishbowl Inventory** software in action, schedule an interactive 1-1 demo session. You connect to the desktop of a trained Inventory Software Specialists via GoToMeeting and get a personalized explanation of the product, its features and how it will work within your business. The demos can last anywhere from 10 minutes to 1 hour.

Fishbowl Inventory is a powerful solution that will save you money & time, allow you to compete at a higher level, and significantly grow your business.
